

ZAIN UL ABIDIN

Backend Software Engineer

Islamabad, Pakistan | +923335771397 | hizainulabidin@gmail.com | linkedin.com/in/z4yn | github.com/guesswhoazayn | z4yn.vercel.app

SUMMARY

Backend Software Engineer specializing in designing and building scalable, secure server-side architectures. Proficient in Node.js, Express, and database management using MongoDB and PostgreSQL. Experienced in implementing asynchronous message queues (BullMQ/Redis), developing robust REST and GraphQL APIs, and optimizing deployments with Docker and CI/CD pipelines.

TECHNICAL SKILLS

Backend & Languages	Node.js, Express.js, TypeScript, JavaScript, Python, SQL, C++
Databases & Caching	MongoDB, PostgreSQL, MySQL, Redis
APIs & Message Queues	REST APIs, GraphQL, Socket.io, BullMQ
Identity & Security	JWT, OAuth, Role-Based Access Control (RBAC), Data Encryption
Cloud & DevOps	Docker, CI/CD pipelines, Linux, AWS/Vercel/Render, Git
Frontend Basics	React, Next.js, HTML5/CSS3

RELEVANT EXPERIENCE

Picket: Automated Candidate Verification Platform <i>picket-hr.vercel.app github.com/guesswhoazayn/picket</i>	2026
- Engineered a scalable Node.js/Express backend capable of processing 500+ resumes asynchronously using BullMQ and Redis, significantly reducing HR screening bottlenecks. - Designed optimized MongoDB schemas and implemented secure real-time status communication via Socket.io for AI-driven plagiarism detection pipelines.	
Attestify: Decentralized Credential Verification <i>attestify-alpha.vercel.app github.com/guesswhoazayn/attestify</i>	2025
- Developed robust backend APIs in Node.js to handle complex workflows including PDF certificate generation, automated email notifications, and IPFS distributed storage. - Implemented secure, role-based access control (RBAC) and integrated smart contracts for on-chain credential verification securely bridging Web2 databases with Web3 components.	
Homivio: Modern E-Commerce Storefront <i>homivio-ecom.vercel.app github.com/guesswhoazayn/homivio</i>	2024
- Architected serverless API functions to securely process dynamic checkout workflows and integrate Stripe payment processing without exposing sensitive credentials. - Modeled inventory and user relational data, ensuring transactional integrity during the e-commerce purchase flow and efficient data retrieval for the admin panel.	

EDUCATION

The University of Chakwal <i>Bachelor of Science in Computer Science</i>	2022 – 2026
CGPA: 3.41 / 4.00 Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Advanced Network Programming	

PUBLICATIONS

Attestify: A Hybrid Blockchain-IPFS Framework for Credential Verification <i>Published in Spectrum of Engineering Sciences</i>	2026
- Authored a paper proposing a novel decentralized architecture combining non-transferable Soulbound Tokens (SBTs) and dual-anchor document integrity (SHA-256 and IPFS) to reduce academic fraud. DOI: 10.5281/zenodo.20655578 Read Paper: thesesjournal.com/index.php/1/article/view/3193
