

ZAIN UL ABIDIN

Frontend Software Engineer

Islamabad, Pakistan | +923335771397 | hizainulabidin@gmail.com | linkedin.com/in/z4yn | github.com/guesswhozayn | z4yn.vercel.app

SUMMARY

Frontend Software Engineer specializing in building responsive, high-performance web applications. Proficient in crafting intuitive user interfaces with React, Next.js, and TailwindCSS, and integrating robust backend services. Experienced in managing complex global states using Redux Toolkit and Zustand, and streamlining deployment workflows with modern cloud platforms like Vercel.

TECHNICAL SKILLS

Frontend Frameworks	React, Next.js, TailwindCSS, HTML5, CSS3
Languages	JavaScript, TypeScript, Python, SQL
State Management	Context API, Redux Toolkit, TanStack Query, Zustand
APIs & Integration	REST APIs, GraphQL, Socket.io, BullMQ, Stripe Payments
Backend & Databases	Node.js, Express.js, MongoDB, PostgreSQL, Redis
Cloud & DevOps	CI/CD, Docker, Git, GitHub, Vercel, Render

RELEVANT EXPERIENCE

Picket: Automated Candidate Verification Platform <i>picket-hr.vercel.app github.com/guesswhozayn/picket</i>	2026
- Designed and built a highly responsive React dashboard with server-state caching (TanStack Query) and protected routing, enabling hiring managers to effortlessly track live pipeline progress. - Implemented real-time candidate status updates on the frontend via Socket.io, integrating with a Node.js/BullMQ backend that processes 500+ resumes asynchronously.	
Attestify: Decentralized Credential Verification <i>attestify-alpha.vercel.app github.com/guesswhozayn/attestify</i>	2025
- Built a dynamic React frontend featuring role-based dashboards for issuers, students, and employers, utilizing TailwindCSS for a sleek and modern user experience. - Developed intuitive UI workflows for on-chain credential verification, QR code scanning, and batch certificate issuance, seamlessly integrated with a Node.js and MongoDB backend.	
Homivio: Modern E-Commerce Storefront <i>homivio-ecom.vercel.app github.com/guesswhozayn/homivio</i>	2024
- Created a performant frontend e-commerce application using Next.js and React with dynamic product routing and a persistent shopping cart powered by React Context and localStorage. - Built a fully responsive storefront covering product browsing, cart management, and seamless Stripe payment integration, alongside an admin panel for inventory management.	

EDUCATION

The University of Chakwal <i>Bachelor of Science in Computer Science</i>	2022 – 2026
CGPA: 3.41 / 4.00 Relevant Coursework: Data Structures & Algorithms, Web Engineering, Software Engineering, UI/UX Design Principles, Database Management Systems	

PUBLICATIONS

Attestify: A Hybrid Blockchain-IPFS Framework for Credential Verification <i>Published in Spectrum of Engineering Sciences</i>	2026
- Authored a paper proposing a novel decentralized architecture combining non-transferable Soulbound Tokens (SBTs) and dual-anchor document integrity (SHA-256 and IPFS) to reduce academic fraud. DOI: 10.5281/zenodo.20655578 Read Paper: thesesjournal.com/index.php/1/article/view/3193
